

6 Month IoT Project Management Internship (AQUPMo8o6)

The Host Company

This host company protects thousands of lives around the world every year due to its flood management expertise. Thanks to their previous successes, they are now involved in an ambitious International project to predict, protect and react to natural disasters.

Role

Within this international project, the host company offers a fantastic project management internship opportunity to apply IOT (Internet of Things) development knowledge. It is an opportunity to collaborate within an international network, working on ways of using new technology, to save lives when a natural disaster occurs. Strategic partners such as UNESCO and Cisco are keen to work with this company to help people in potential disaster areas to be safer.

Location

Oxford, the city is known worldwide as the home of the University of Oxford, the oldest University in the English-Speaking world. It is one of the fastest growing UK cities and most ethnically diverse. Oxford has numerous major tourist attractions, many belonging to the university and colleges.
