

## Apply here

### Start date

Flexible

### Duration

6 months

### Languages

Good spoken and written English levels are required (B2 onwards)

### Location

Huddersfield, England

Huddersfield offers a mix of traditional northern England alongside modern city living. Famed for its film set countryside, this bustling industrial city also offers independent shopping, a busy nightlife, sporting excellence and a claim to being one of the friendliest places to inhabit in the UK.

### Are you eligible?

Are you a registered student?  
Or

Are you eligible to participate in the Erasmus+ programme?

### Benefits

See website for details of all ESPA benefits. For all internships over 6 months, additional benefits will be paid. Details available at interview.

## Role

The successful candidate will be involved on an exciting project managing their own machine production from initial design to working model. This is an excellent opportunity for the intern to gain valuable industry knowledge across a broad range of skills.

## Tasks

- Evaluate, draw, re-draw and review where necessary, existing parts and assemblies in 2D CAD, fabrication jig designs and production methods
- Select appropriate materials
- Create comprehensive machine part lists
- Create and update operating manuals
- Build working relationship with suppliers
- Assist in the build and testing process of the prototype
- Assist in the build and testing process of the working model

## Desired Skills

- Knowledge of 2D CAD BriesCAD (similar to AutoCAD)
- Good knowledge of Microsoft Office components (Excel, Word, Outlook)
- Innovative individual who likes to be challenged
- Ability to work using own initiative
- Good communication skills
