

Apply here

Start date

Flexible

Duration

6 months

Languages

Good spoken and written English levels are required (B2 onwards)

Location

Bristol, England

Bristol is the largest city in the South West of England sitting on the Bristol Channel. It has a reputation for its uniquely urban cultural mix, with thriving creative, legal and financial economies. Bristol also offers sporting excellence, a lively nightlife, bars and restaurants aplenty, music diversity and maritime history.

Are you eligible to participate in the Erasmus+ programme?

Benefits

See website for details of all ESPA benefits. For all internships over 6 months, additional benefits will be paid. Details available at interview.

Role

The successful candidate will be working on different Web development projects within an established development team and alongside the Technical Director.

One of the main projects the intern will be working on is the development of a quality Chatbot feature (the prototype is already developed) to integrate to their current website development offering. The intern will have access to online resources and tutorial sites to supplement their training, as well as guidance and mentorship from team members.

Tasks

- Assist with the build and test of a Chatbot.
- Write clean efficient code to integrate the Chatbot into websites, other third-party services and APIs
- Collaborate within a small team to build products to the best possible quality, such as a tool to rank different law firms
- Document configuration and installation details of developed products

Desired Skills

- Familiar with AI concepts around intents and entities would be ideal
- Comfortable with Node.js or AWS Lambdas
- Knowledge of webhooks/APIs
- Ability to work with HTML, CSS, JavaScript

The Host Company

This digital agency offers bespoke communication solutions for its clients, including the design of websites to assist law firms to better communicate and interact with their customers. The company offers a 'full service'
