

# ESPA Full Time Graduate Opportunity (NANGR0211)

Pharmaceutical Industry

## Apply here

### Start date

January 2018

### Languages

Good spoken and written English levels are required (B2 onwards)

### Location

Newport, Wales

Surrounded by beautiful countryside, Newport used to be at the heart of the coal and steel industry, and since it's decline, has experienced significant regeneration, and is now a hub for new technologies and innovations. Cardiff, the vibrant capital city with its large student population and buzzing nightlife, is only a short train ride away, so there will be plenty of things to keep you entertained.

### Are you eligible?

Are you a registered student?

Or

Are you eligible to participate in the Erasmus+ programme?

### Salary

Negotiable depending on experience  
Relocation assistance available

## Role

This established company seeks to recruit a motivated and enthusiastic Graduate to conduct scientific research and development related to orally inhaled and nasal drug products. You will work on challenging assignments and receive the necessary training and development for a successful and rewarding career.

## Tasks

- Planned work to provide & support project milestones for inhaled drug product development
- Responsible for pharmaceutical analysis using analytical techniques for inhalation product testing, using support technologies as appropriate
- Maintain written records of all experimental work in accordance with company policies.

## Desired Skills

### Essential:

- A recent graduate in Chemistry/Physics/Biology or any related degree (Masters or Bachelors)
- Able to perform routine and non-routine analytical tests
- Understand modern analytical techniques.

### Desirable:

- Experience of HPLC.

## The Host Company

Established in 2002, this innovative company is a leader in the development and provision of orally inhaled and nasal drug products (OINDPs). From the laboratory, through to the clinic and product registration, their expert team supply tailored solutions for different drug products. This vibrant company has a young feel about it, having provided many internships, some of which have been converted into full time employment. You will be guaranteed a fulfilling career with opportunity for advancement.
