Benefits

See website for details of all ESPA benefits. For all internships over 6 months, additional benefits will be paid. Details available at interview.

Role

This is an exciting opportunity for a Software Engineering student to gain practical experience in the data services industry. Mentored throughout, you will assist in the transfer of an SQL database into Python, including documentation, testing and all other related activities. This challenging assignment will be a great addition to your CV and boost to your future career.

Tasks

- Transferring an SQL database into Python
- Writing Specifications
- Producing technical documentation
- Testing
- Communicating with other Team members

Desired Skills

- A degree in Software Engineering or similar
- Experience with Python and SQL essential
- Experience with R or Spark desirable

The Host Company

The host company, launched in 2005, is a specialist data solutions provider, owning and solving complex technical and business change initiatives in a practical and hands-on way. Utilising their exclusive software range, they provide clients with bespoke solutions to address their specific business needs, giving them the advantage of clean, organised and legally compliant data. This company has a work hard-play hard ethic, so an internship here is guaranteed a great experience.
