

ESPA Data Analyst Internship (BOXDA1201)

Apply here

Start date

February/March

Duration

6 months

Languages

Good spoken and written English levels are required (B2 onwards)

Location

Bristol, England

Bristol is the largest city in the South West of England. It has a reputation for its uniquely urban cultural mix, with thriving creative, legal and financial economies. Bristol also offers access to sporting excellence, a lively nightlife, bars and restaurants aplenty, music diversity and many historical sites.

Are you eligible to participate in the Erasmus+ programme?

Benefits

See website for details of all ESPA benefits. For all internships over 6 months, additional benefits will be paid. Details available at interview.

Role

This is a great internship opportunity for a student with a keen interest in big data to gain invaluable experience supporting projects with several of the company's most prestigious blue-chip clients like Safran, Bentley and Airbus. Mentored by the Chief solutions officer you will assist across all stages of project delivery from kick-off meetings to installation and testing. This challenging internship will be a great boost to your personal development as well as your CV and career aspirations.

Tasks

- Analysing, preparing and loading customer model data into our advanced modelling tool
- Authoring and refreshing documentation
- Coordinating and completing customer installations
- Specifying and testing new features
- Competitive analysis
- Building demonstration models
- Supporting our cloud services
- Administering our customer help portal

Personal Skills

- Any Degree discipline considered, but must have an interest and aptitude for big data
- Good written English
- Strong interest in modelling complex systems and processes, including supply chains, often for blue chip high end clients
- Interest in Artificial Intelligence and machine learning
- Excellent Excel skills
- Can do, self-learning attitude
- Well-presented professional who will delight the customer
- Willing to travel
- Willing to go the extra mile, when needed, to meet tight deadlines

The Host Company

The host company provides complete digital solutions to solve the challenges of complexity across a web of business processes. The business was conceived originally from a collaboration between Rolls Royce Aerospace and the University of Southampton, with the aim to develop solutions to manage the complexities within the aerospace industry better. They provide a dashboard and tools to manage and ensure cohesion in every aspect of business including Planning and Execution, Operational Performance and Process and Production plus more. With customers including Airbus, Boeing, Siemens and the US Navy, this host is continuing to grow at a fast rate.
