Benefits

See website for details of all ESPA benefits. For all internships over 6 months, additional benefits will be paid. Details available at interview.

Role

This is a fantastic opportunity for a passionate individual with creative flair in abundance, to utilise their skills and experience, to demonstrate the versatility of the host company's digital printing solutions. Mentored throughout, you will assist in the creation and production of printed applications through a diverse range of specialist printing technologies. This is will be a great addition to your CV as you will have the opportunity to develop a wide portfolio of work with more creative freedom and involvement than what could be achieved working within an agency.

Tasks

Under the guidance of the Creative Director, you will:

- Identify and propose creative applications and design styles
- Develop artwork designs for applications
- Produce finished printed artwork – full training to be provided
- Document the production and finished applications through video or photography

Personal Skills

- Design, Illustration & Photo/videography with good working knowledge of Adobe Creative Suite CC
- Practical hand to eye - dexterity for application production
- The ability to tackle creative challenges with a lateral approach
- Creative flair
- A degree of technical ability is preferable but not essential

The Host Company

The host company is the world's number one provider of wide-format inkjet printers for the durable graphics market, and has proven time and time again to provide excellent customer service, training and support to end users over the years. Listed on the Tokyo Stock exchange, this company recently expanded its portfolio to include 3D printing solutions and digital printers for different materials increasing the versatility and market potential. With their historical successes, they are well placed to dominate the market for years to come.
