Start date

Flexible

Duration

6 months

Languages

Good spoken and written English levels are required (B2 onwards)

Location

Swansea, Wales

Swansea is the second largest city in Wales, hosting a large student population and buzzing nightlife. Situated in the UK's first Area of Outstanding Natural Beauty, you can relax on award winning beaches and explore the unspoilt Gower Peninsula, a must for hikers. The rugged coastline provides a paradise for water sports enthusiasts including surfing, wind, and kite surfing, where you can also observe the local dolphin and porpoise pods in their natural habitat. This beautiful area has something for everyone.

Are you eligible?

Are you a registered student?
Or

Are you eligible to participate in the Erasmus+ programme?

Benefits

See website for details of all ESPA benefits. For all internships over 6 months, additional benefits will be paid. Details available at interview.

Role

This is a fantastic opportunity for a proactive App Developer to gain practical experience within this rapidly expanding host company. Mentored throughout, you will assist in the development of their call blocking IOS mobile applications. This is a great chance to showcase your skills and boost your career aspirations.

Tasks

- Design and build mobile platforms for IOS
- Developing and coding for IOS
- Working on bug fixing and improving application performance
- Continuously discover, evaluate, and implement new technologies to maximise development efficiency
- Assisting with front end web development on in-house projects.

Personal Skills

Required:

- Knowledge of iOS SDK, Swift and Objective-C
- Good understanding of design patterns and Object-Oriented Programming
- Knowledge of iOS UI/UX design principles, patterns and best practices
- Experience of working with RESTful APIs
- Knowledge of an Agile Scrum environment and collaborative tools (e.g Jira)
- Understanding of build processes and CI tooling (e.g. Jenkins, Fastlane)

Good to have:

- Experience with Instruments and advanced debugging
- Knowledge of Auto Layout, Storyboards, XIBs
- Experience with iTunesConnect, release process
- Experience with Unit/UI testing (e.g. XCTest, Appium, Nimble, OHHTTPStubs)

The Host Company

The host company is an award-winning organisation providing solutions to prevent nuisance and scam telephone calls to both businesses and homes. Their unique products are now sold in 12 countries worldwide including the USA, UK, Australia and France. With constant updates, they are always one step ahead in blocking the newest types of nuisance calls and the technology that the cold calling and scam calling industry is using. Going from strength to strength, they are targeting new countries to supply this invaluable product.
