Benefits

See website for details of all ESPA benefits. For all internships over 6 months, additional benefits will be paid. Details available at interview.

Role

This is fantastic opportunity for a student with a keen interest in analysing data, to gain practical experience with this host to aid the development of their cloud-based spending solutions platform, for individual customer needs. Mentored throughout, you will be responsible for creating data products with a commercial focus that have a direct impact on the performance of the customer's business, with the ultimate aim of giving the customer full visibility of their spending. This internship is a great opportunity for personal and professional development within this international organisation.

Tasks

- Carry out analysis and validation of customer data prior to processing using existing data models within an industry standard data modelling suite
- Apply existing knowledge and internal best practice to build on existing data models to improve quality, performance, external interfaces, constraints and accuracy of output
- Accurately enhance customer data using proprietary techniques, systems and existing data library
- Manage customer requirements and ensure they are processed and applied appropriately
- Ensure that various appropriate infrastructure elements; such as customer documentation, manuals, are kept up to date and are available
- Create, adapt and develop customer dashboards to ensure that all available information is displayed aesthetically whilst ensuring accuracy and understandability
- Support the Senior Data Analyst on ad-hoc projects as required.

Personal Skills

Hard Skills

- Expert user of Microsoft office especially Excel

Soft Skills

- Articulate; report writing/emails to clients
- Methodical; orderly or systematic in thought or behaviour
- Analytical; ability to collect, organize, analyse and disseminate significant amounts of information with attention to detail and accuracy.

Nice to have

- Some data analyst experience
- Degree in Mathematics, Economics, Computer Science, Information Management, Accountancy or Statistics
- Experience using data modelling software
- Experience coding in SQL
- Experience coding in VBA

The Host Company

The host company is a world leader in the provision of unified cloud Spend Management Solutions for medium and large size enterprises that typically operate on a global scale. The software platform provides greater visibility into and control over how companies spend money achieving significant savings and driving profitability. Since its launch this platform has helped customers globally to bring billions of dollars in cumulative spend, under management. Expanding rapidly, this host is seeking talented individuals to join them in their success.
