Benefits

See website for details of all ESPA benefits. For all internships over 6 months, additional benefits will be paid. Details available at interview.

Role

This is a fantastic opportunity for an enthusiastic, engineering student from any discipline to gain experience within this rapidly expanding investment company which focuses on High-Tec innovations that benefit the environment. Mentored throughout, you will assist the team in evaluating and managing exciting new products to see if they have potential to grow into successful businesses. So, if you are a technically minded student interested in venture capitalism and Hi-Tech innovation, then this could be a life changing and career boosting experience.

Tasks

- Throughout the course of the internship, the successful candidate will assist in the following:
- Sourcing, filtering and evaluating investment opportunities
- Conducting broad market research into areas of strategic interest for the host
- Assisting in deal negotiation, structuring and execution
- Representing the firm at industry events
- Setting up and attending meetings with stakeholders and partners
- Administrative functions required to ensure smooth operation of the company

Skills

- Studying for a degree involving a high level of numerate competency such as business, science, engineering or finance
- An analytical mind, capable of synthesizing large amounts of information
- Demonstrated interest in technology and entrepreneurship
- Able to take initiative: an independent worker able to manage their own projects
- A high level of computer literacy, particularly with modelling in Excel
- Effective working in a small team as well as on individual projects
- Strong written and oral communication.

The Host Company

This innovative host is an investment firm that backs high-growth entrepreneurial companies with a focus on energy, transport, circular economy, and Smart City and Industrial High-Tech sectors. They make initial and later stage investments, maximising mentorship, business

ESPA
