Benefits

See website for details of all ESPA benefits. For all internships over 6 months, additional benefits will be paid. Details available at interview.

Role

This is a fantastic opportunity for a proactive, problem solving software engineer keen to gain practical experience in this established ESPA host. Mentored throughout by experienced engineers, you will be a vital link in the software development cycle where you will learn how to write test cases, update automated user tests and use your problem-solving skills to discover bugs and defects. This is a great chance to ensure you have the complete package in terms of software development from start to finish. ESPA has placed many successful interns with this host, many of which have been offered full time contracts.

Tasks

- Work together with developers to understand the capabilities of features they are building
- Help to write test cases for features under development
- Use exploratory testing techniques to discover unknown defects and regressions
- Help grow and maintain company's suite of automated user tests
- Contribute to a variety of projects and problems

Desired Skills

- Background in computer science or a related discipline
- Experience with manually testing software, writing test-cases and/or exploratory testing
- Competent in using JavaScript or Typescript
- Understanding of HTTP and calling REST services
- Knowledge or awareness of using HTML markup and styling with CSS

The Host Company

This highly successful host company specializes in providing open source digital business platforms to organisations throughout the world. They connect people, content and processes, enabling seamless efficiency, decision making and productivity. This cloud-based product has experienced explosive growth and the company is now doubling their investment to take the business to the next level. There are plenty of opportunities to impress and be part of their success story. ESPA has placed many successful interns with this host.
