Or

Are you eligible to participate in the Erasmus+ programme?

Benefits

See website for details of all ESPA benefits. For all internships over 6 months, additional benefits will be paid. Details available at interview.

Role

This is a fantastic opportunity for a proactive Software Developer, interested in back end development to gain practical experience within this highly successful host company who provide unique digital business solutions. Mentored throughout by experienced developers, you will not only be using your existing skills but have every opportunity to learn new software and processes, making this a great addition to your CV and a real boost to your career prospects.

Tasks

- Pair with other developers to help with tasks under development
- Investigate root causes of defects identified in the software and find improvements, working with other team members
- Write unit tests to verify bug fixes and new functionality
- Work with other team members responsible for verifying new functionality and bug fixes

Personal Skills

- Background in Computer Science or a related discipline
- Some experience writing basic Object-oriented code in language such as Java, C#, C++ etc.
- Some experience in writing and executing unit tests

Good to have:

- Experience with compiling code and managing third-party dependencies via Maven/npm package manager or similar

The Host Company

This highly successful host company specialises in providing Digital Business platforms to organisations throughout the world. They connect people, content and processes, enabling seamless efficiency, decision making and productivity. This cloud based product has experienced explosive growth and the company are now doubling their investment to take the business to the next level. There are plenty of opportunities to impress and be part of their success story.
