Good spoken and written English levels are required (B2 onwards)

Location

Bristol, England

Bristol is the largest city in the South West of England. It has a strong reputation for creativity, digital innovation, and social enterprise, and is the home of Oscar-winning Wallace and Gromit and urban artist Banksy. Offering a lively nightlife, bars, and restaurants aplenty, musical diversity and many historical sites. In early 2019, Bristol was voted the **best place to live outside of London** for people under 26 years of age.

Benefits

See website for details of all ESPA benefits. For all internships over 6 months, additional benefits will be paid. Details available at interview

Role

This is a fantastic opportunity for an enthusiastic, analytical individual to gain practical experience with this global pioneer in renewable fuels, who as well as manufacturing the equipment, are now looking to become a major sustainable fuel producer. Mentored throughout, the successful candidate will support management with research and analysis of potential markets and commercial opportunities in renewable fuels. This is a great chance for a talented business student, preferably interested in sustainability to apply themselves to real-world challenges and to gain experience in an entrepreneurial organisation at the point of global growth.

Tasks

- Multi-stakeholder research (global scope) including competitors, regulators, innovators in related and unrelated sectors
- Horizon scanning, future landscaping, and gap analysis
- Risk analysis and other business analyses as required such as PESTLE, SWOT.
- Gathering and analysing data using both quantitative and qualitative approaches, through online sources and outreach to selected stakeholders
- Presenting the results to management with interpretation

Desired Skills

- Working towards a degree in Business, economics or other related
- Intelligent, analytical mindset
- A keen interest in renewables, sustainability
- Excellent written and verbal communication skills
- Numeracy with good level of competence in Excel
- Attention to detail
- Proactivity, tenacity
- Self-motivation, drive to succeed

The Host Company

Established in 2003, this green host is the World's leading and longest established manufacturer and installer of biodiesel processing plants, to produce the highest quality biodiesel as up to a 100% replacement for fossil diesel. With customers throughout the world, their bio-diesel fuels are used in road transport, rail and energy production including famously the fleet of vehicles used by the Royal Family. **There are exciting changes ahead as they are now undergoing a transformation from equipment manufacturer to fuel producer and executing an ambitious rollout in key markets worldwide.**
