See website for details of all ESPA benefits. For all internships over 6 months, additional benefits will be paid. Details available at interview.

Role

This is a fantastic opportunity for a creative student with a passion for UX/UI to gain practical, hands on experience within this fast growing start up. Mentored throughout, you will assist in the design and prototyping of web and mobile applications for the host's video communications dashboard, which allows relatives and healthcare professionals to video call and monitor the health of their loved ones or patients. This is not only a great chance to showcase your skills and creativity but you will also be contributing to a very worthwhile, groundbreaking product.

Tasks

- Defining the structure and flow of a user experience
- Detailed wireframes and prototypes for mobile apps and web
- Defining and validating concepts within user testing
- Creating user interfaces across a range of mobile app and web platforms
- Working closely with developers to test designs in real world settings

Desired Skills

- Educational background in computer science, business informatics or related
- Knowledge in human computer interaction, cognitive psychology, information science, technology of communications and user experience is an advantage
- Knowledge of Sketch, InVision and Adobe Creative Suite
- Understanding of user-centered design principles and methodologies.

The Host Company

The host is a rapidly growing innovative start-up that has developed a video communication system that can be run through a normal television. Aimed primarily at the older generation, this intuitive device allows families to keep in touch with their loved ones with the push of a single button on a remote control. It can also be used by members of the Healthcare industry to monitor patient's health with integrated IoT devices, such as heart rate monitors and also send reminders for example, for doctor's appointments or to take medication. With a healthcare system under pressure and an ever-aging population requiring care this innovative device could literally be a life saver.
